## **TITLE: Depigmentation treatment in Vitiligo**

**Name:** Hernán Herrera, Ninoska Porras

**Affiliation:** Resident Dermatology/Universidad de Santiago de Chile

**Country:** Chile

**Email ID:** [hernan.herrera07@gmail.com](mailto:hernan.herrera07@gmail.com)

### **ABSTRACT (upto 300 words)**

Vitiligo is a condition that produces achromic spots on the skin, which can be treated, however, when they are refractory to treatment or extensive, the patient should be given the option of depigment their skin and improve aesthetically. A patient with vitiligo on the face is presented, who is given the opportunity to use Hydroquinone 20%, which after approximately 1 year produces a satisfactory result.

### **BIOGRAPHY (upto 200 words)**

I am a Doctor graduated from the University of Santiago de Chile and I have a Master's Degree in Epidemiology from the Pontificia Universidad Católica de Chile, in addition, I have 5 graduates.
